Justin John — 09/28/2021
with the tests, I think you're supposed to pass in null when you test instead of "", or
itll fail

Also, for the last 2 tests, should we have commented it out since it gives a failed
report for mvnw package?
the bottom 2 tests work on my end tho

Mohammed Mousa — 09/28/2021
Yeah last semester they apparently wanted some failed tests so I thought they
wanted one here not too sure
Mohammed Mousa — 09/28/2021

"Hello Seth,

My bad, I missed your message, sorry!

It's not important how many features you are completing. A number of the features for each team can be vary based on the number of people, the planning, and what happened during a sprint, and what did you learn from the sprint, how did you apply that to the next sprint, and your communication with PO and within the team. These are all factors that can influence the number of features (or your sprint backlog).

Please negotiate with your tutor, it can be miscommunication, or your tutor perhaps means finish what has been left in the sprint backlog.

I announced earlier before assignment release and explained that you should follow continued sprints right after submission.

The project was released beginning of the semester, teh submission was released later, though if you need more time, please send me an email and we can assess your request.

I hope this helps.

Regards,

Homy"

Daniel Marmion — 10/10/2021

Daniel Marmion — 10/10/2021
and i think rylan was doing log in, so its just sign up for now
atm is just redirects you to the homepage if you successfully create an account
Justin John — 10/10/2021
oh right
did you only have to write code in the js file or was there other files you needed to edit?
Daniel Marmion — 10/10/2021
it was all front end, but only because register already existed in the backend
Justin John — 10/10/2021
cuz im working on the shop owner page where the shop owner can add a new book, so some tips would be helpful
Justin John — 10/10/2021

Daniel Marmion — 10/18/2021

watch that not happen
Rylan Koneri — 10/18/2021
ahahaha lmao no faith in him
Daniel Marmion — 10/18/2021
but literally all the feedback we do have was done by dipto

none from homy so far
Justin John — 10/18/2021
our other mates focused on implementation but they got 70 too
so as long as we ace documentation and testing, we'll be g

Mohammed Mousa — 10/18/2021

Justin John — 10/18/2021
yeah sure
Rylan Koneri — 10/18/2021

SPRINT REVIEW: this sprint and last sprint
SPRINT RETRO: last sprint
REFACTORING REPORT
DOCUMENTS ON GITHUB
Daniel Marmion — 10/20/2021
a PROJECT REPORT:

    a "Vision" statement, i.e., a description of the why the product is "valuable" (about 1/2 page)
    a figure showing the final basic system architecture / design --- this does not need to be a UML diagram: a box-and-lines sketch architecture is fine; focus on the 3 tiers (front, backend, datastore) and what components are in each
    a report describing any refactoring, including refactoring to a Design Pattern, if appropriate, as well as the "smells" that you found (i.e., purpose for refactoring)
    an overview of your Gitflow organisation and how often you committed
    a description of your Scrum process: how often you met, who was Scrum Master
    a diagram of your Deployment pipeline setup: i.e,. CI/CD, steps in the pipeline, automation tools in the pipeline
    documentation of acceptance test cases and evidence of test execution (when they were run; pass/fail status of each run)
Mohammed Mousa — 10/20/2021
JIRA - more work
ACCEPTANCE TESTING - criteria for all user stories
UNIT TESTING - MORE TESTS (NEGATIVE + POSITIVE CASES)
Daniel Marmion — 10/20/2021

looks like i have it working with MySQL, only thing is we'll have to repopulate the data

Justin John — 10/20/2021
all the insert statements should be in data.sql
can we use those?
Daniel Marmion — 10/20/2021
yeah i just copied one from there and it worked
so thye should all work, about to test that
Justin John — 10/20/2021
oh okay sweet
Daniel Marmion — 10/20/2021
yep it works
Justin John — 10/20/2021
easy
Daniel Marmion — 10/20/2021
all you have to do is copy what was in data.sql into mysql workbench and run it
Justin John — 10/20/2021
right okay sweet
Justin John — 10/20/2021
is there anything else I need to do before ./mvnw package? (for sql branch)

Daniel Marmion — 10/20/2021
there's a couple of commands you need to do in mysql workbench first
i'll get them in a sec
Justin John — 10/20/2021

i cant start a new connection either

Daniel Marmion — 10/20/2021
create database bookeroo;
create user 'springuser'@'%' identified by 'ThePassword'; -- Creates the user
grant all on db_example.* to 'springuser'@'%'; -- Gives all privileges to the new user
on the newly created database
i never started a new connection
Justin John — 10/20/2021
yeah im trying to
Daniel Marmion — 10/20/2021
i just used the thing that was already there and used those commands
Justin John — 10/20/2021
but it keeps failing?
Daniel Marmion — 10/20/2021
i just had this on the homepage of mysql workbench

Justin John — 10/20/2021
did you only download mySQL workbench or also sql connection?
Daniel Marmion — 10/20/2021
i just did the default installation, this is through mysql workbench
Justin John — 10/20/2021
oh right
Rylan Koneri — 10/21/2021
im assuming we have no users on the H2 database created right?
Daniel Marmion — 10/21/2021
no, none by default
you have to create them either through the signup form or by sending api requests
Rylan Koneri — 10/21/2021
okay sweet thanks!
Daniel Marmion — 10/21/2021
i have a couple of example user json things if you need them in code
Mohammed Mousa — Yesterday at 3:55 PM

Rylan Koneri — Yesterday at 3:56 PM

Daniel Marmion — Today at 6:42 PM

Justin John — Today at 6:43 PM
oh yep
just make 1 or 2 and screenshot as proof
probs all we need
Daniel Marmion — Today at 6:43 PM
also if any of you do any testing (even through postman or whatever), take a screenshot and add it to the 'admin details' document
we'll want all the evidence we can get
Justin John — Today at 6:45 PM
